

Corporate Fact Sheet

About Intellectual Ventures

Founded in 2000, Intellectual Ventures is a privately-held invention capital company. We are building a market for invention by making invention a profitable activity. With more than \$5 billion under management and more than 35,000 IP assets, we own one of the world's largest and fastest-growing intellectual property portfolios, which we license to the world's most innovative companies. Investors include a mix of Fortune 500 companies, individuals and institutions.

Build

We invent and collaborate with world-renowned experts, including Nobel Prize winners. Scientists and engineers at our lab facility invent technology-based solutions to some of the world's most pressing problems.

Buy

We acquire inventions from individual inventors, companies of all sizes, brokers and sellers, and then compile the patents into industry-focused portfolios.

Partner

We source inventions from a global network of inventors and assist with developing, patenting and monetizing those inventions. We partner with universities, government institutions and research labs to incentivize the process of invention.

License

We engage with companies of all sizes to minimize their Invention Gap™ exposure – the difference between the invention rights they have and the invention rights they need – and we act as a strategic partner for present and future intellectual property needs.

Founders

Nathan Myhrvold, CEO
Edward Jung, CTO
Peter N. Detkin, Vice-Chairman
Greg Gorder, Vice-Chairman

Officers

Adriane Brown, President and COO
David Kris, General Counsel
Russell L. Stein, EVP and CFO
